LinkedIn GitHub

AWS-Certified **Senior DevOps Engineer** with over 8+ years of IT experience designing, modernizing, and operating enterprise-scale cloud platforms within Global Capability Center (**GCC**) environments. Proven track record of building secure, resilient, and cost-optimized **AWS** infrastructures using **Terraform**, **Kubernetes**, and **CI/CD** automation. Experienced in supporting global stakeholders, aligning platform engineering practices with governance standards, and driving operational excellence across distributed teams. Recognized for delivering scalable cloud-native solutions that enhance reliability, developer productivity, and business agility.

PROFESSIONAL EXPERIENCE

Senior Cloud Engineer
Waters Corporation **03/2026 – Present**

- Contributing to enterprise cloud modernization initiatives within **Waters Corporation's Global Capability Center**, supporting globally distributed business units and engineering teams.
- Cloud Infrastructure Design: Spearheaded the design and deployment of scalable and reusable **AWS** infrastructure using **Terraform** and **Terragrunt**, ensuring modular configurations for rapid scalability.
- Managed **Kubernetes** clusters across multiple environments, ensuring robust security, optimized performance, and cost-effective resource utilization, and deployed **Helm charts** for infrastructure and application services to standardize and accelerate deployments.
- Enhanced service communication and traffic routing by implementing **Istio Service Mesh, Nginx Ingress Controller** and **Envoy Gateway** improving overall system reliability and performance.
- Maintained and optimized **CI/CD** pipelines using **Spinnaker** and **Jenkins**, **GitHub Actions** enhancing deployment reliability and minimizing manual intervention.
- Proactive Monitoring: Integrated monitoring solutions like **Datadog** and **AWS CloudWatch**, ensuring 24/7 system reliability and enabling actionable insights for preemptive issue resolution.
- Cost Optimization: Proactively monitored **AWS** resource usage and implemented dynamic scaling policies, reducing cloud costs without compromising performance or availability.
- Actively participated in **agile** workflows, including sprint planning, daily stand-ups, and retrospectives, contributing to collaborative and efficient development cycles.
- Developed and maintained **shell scripts** to automate routine tasks such as backups, monitoring, and system updates, enhancing operational efficiency.
- Leveraged AI tools like **GitHub Copilot** and **Cursor** to automate repetitive tasks and enhance operational efficiency like implemented infrastructure testing using **Terratest (Go)** to validate Terraform modules, enforce configuration correctness, and prevent regression during environment provisioning and developed **Python**-based automation scripts to streamline operational workflows, including configuration validation, deployment checks, and environment health verification.

Senior Associate Consultant (DevOps)
Infosys Ltd. Bangalore **09/2023 – 02/2026**
Client: Waters Corporation (Global Capability Center)

- **Awarded** the "Appreciation Award" for exceptional contributions and consistent performance.
- Cloud Infrastructure Design: Spearheaded the design and deployment of scalable and reusable **AWS** infrastructure using **Terraform** and **Terragrunt**, ensuring modular configurations for rapid scalability.

Information Classification: General

- Managed **Kubernetes** clusters across multiple environments, ensuring robust security, optimized performance, and cost-effective resource utilization, and deployed **Helm charts** for infrastructure and application services to standardize and accelerate deployments.
- Enhanced service communication and traffic routing by implementing **Istio Service Mesh, Nginx Ingress Controller** and **Envoy Gateway** improving overall system reliability and performance.
- Leveraged **Quali Torque** to automate environment provisioning, significantly boosting developer productivity and reducing operational bottlenecks.
- Maintained and optimized **CI/CD** pipelines using **Spinnaker** and **Jenkins**, **GitHub Actions** enhancing deployment reliability and minimizing manual intervention.
- Proactive Monitoring: Integrated monitoring solutions like **Datadog** and **AWS CloudWatch**, ensuring 24/7 system reliability and enabling actionable insights for preemptive issue resolution.
- Developed and maintained **shell scripts** to automate routine tasks such as backups, monitoring, and system updates, enhancing operational efficiency.
- Leveraged AI tools like **GitHub Copilot** and **Cursor** to automate repetitive tasks and enhance operational efficiency like implemented infrastructure testing using **Terratest (Go)** to validate Terraform modules, enforce configuration correctness, and prevent regression during environment provisioning and developed **Python**-based automation scripts to streamline operational workflows, including configuration validation, deployment checks, and environment health verification.

Cloud Engineer
Innoitus India Pvt. Ltd. Bangalore **07/2021 – 08/2023**
Client: Taylor & Francis Group

- **Awarded** the "Star Performer of the Quarter" for outstanding performance and consistent excellence in Jul–Sept 2022, Oct–Dec 2022, and Jan–Mar 2023
- Leveraged a wide range of **AWS** services, including Elastic **Kubernetes** Service (**EKS**), **ECS**, AWS **Lambda**, **S3**, **Elastic File System**, and Elastic Block Storage, to architect scalable and secure solutions.
- Configured, managed, and optimized **Kubernetes** deployments, services, persistent volumes, and secrets, ensuring high-performance containerized workloads.
- Designed and implemented **CI/CD** pipelines using **GitHub Actions**, **Jenkins** to enhance deployment efficiency, reducing manual errors, and accelerating delivery timelines.
- Utilized **Terraform** to provision infrastructure, creating reusable modules that ensured consistency, repeatability, and ease of deployment across environments.
- Set up and configured AWS Managed Prometheus, **New Relic**, and **CloudWatch** for comprehensive monitoring of EKS and other **AWS** workloads, ensuring system reliability and visibility.
- Developed and tested disaster recovery plans, ensuring rapid recovery and minimal downtime during incidents.
- Actively participated in **agile** workflows, including sprint planning, daily stand-ups, and retrospectives, contributing to collaborative and efficient development cycles.

Desktop Support Engineer
Globtier Infotech Pvt. Ltd., Noida **03/2018 – 07/2021**
Client: Wipro

- Conducted health checks, analyzed server performance, identified issues, and implemented effective resolutions to maintain system reliability.
- Provisioned and administered **Windows** and **Linux** servers, optimizing configurations for stability and security.
- Network Administration: Troubleshot and managed **DHCP** and **DNS** services to ensure uninterrupted network operations and address connectivity issues promptly.
- Set up, configured, and managed Apache and Nginx web servers, including virtual host configurations for scalable and reliable hosting solutions.
- Developed and maintained **shell scripts** to automate routine tasks such as backups, system monitoring, and updates, improving operational efficiency.
- Implemented **Windows Deployment Services** (WDS) and Microsoft Deployment Toolkit (MDT) to create and deploy standardized OS images, reducing provisioning time and improving consistency.
- Worked closely with vendors to maintain systems, manage changes, and deploy new systems, ensuring alignment with organizational requirements.

Information Classification: General

Desktop Support Engineer
Kutumbh Care Pvt. Ltd., Noida **12/2017 – 03/2018**
Client: Wipro

- Diagnosed and resolved root causes of **Windows** and **Linux** operating system, hardware, and software issues, ensuring minimal disruption to users.
- Managed user accounts, permissions, and security settings in **Active Directory** and other directory services to maintain secure access controls.
- Implemented and maintained comprehensive security measures, including deploying and updating antivirus software (Sophos, McAfee), **firewalls**, and encryption tools to safeguard systems.
  Leveraged **Windows Deployment Services** (WDS) and Microsoft Deployment Toolkit (MDT) to create and deploy standardized OS images, streamlining the provisioning process.
- Managed user requests and incidents through **ServiceNow**, ensuring all tickets were resolved within Service Level Agreements (**SLAs**) and user satisfaction was maintained.

CORE COMPETENCIES

- **Cloud Platform:** AWS (EKS, ECS, Lambda, S3, IAM, SQS etc.)
- **Containers & Orchestration Tools:** Kubernetes, Helm, Docker, Istio, Nginx Ingres.
- **Infrastructure as Code:** Terraform, Terragrunt & AWS Cloud Formation.
- **Environment as Service:** Quali Torque.
- **Version Control Tools:** Git & GitHub.
- **CI/CD Tools:** GitHub Actions, Jenkins, Spinnaker.
- **Operating System:** Windows & Linux.
- **Web Servers:** Apache, Nginx.
- **Scripting Language:** Shell Scripting.
- **AI Tools:** GitHub Copilot, Cursor, and other AI-driven solutions to enhance automation and productivity.
- **Content Delivery Network Tools:** Cloud Flare, AWS Route 53 & AWS Cloud Front.
- **Monitoring Tool:** Datadog, AWS CloudWatch, AWS Inspector, AWS Security Hub, New Relic.
- **Project Management:** Agile practices, Sprint Planning, Atlassian Jira, Confluence, Service Now, Summit AI & IBM Maximo.

TRAINING & CERTIFICATIONS

- **AWS Solutions Architect Associate:** AWS Certified
- **Master's Program–AWS Cloud Architect**: Simplilearn Certified.
- **NSE-1 & NSE-2 Network Security Associate**: Fortinet Certified.
- **Computer Hardware & Networking (JCHNE+)**: Jetking Certified.

EDUCATION

BACHELOR OF SCIENCE (B.Sc.)
Dr. RML Avadh University (Faizabad, U.P.) 2017

ADDITIONAL INFORMATION

Languages	:	Hindi & English
Hobbies	:	Playing video games, watching movies, bike riding

Information Classification: General
